

INVITATION

# Speculate, collaborate, define

Textile thinking for future ways of living

Exhibition 23 March - 15 May at the Textile Museum in Borås, Sweden

## ArcInTexETN Exhibitions

The exhibition *Speculate, collaborate, define – textile thinking for future ways of living* is an exhibition by the PhD students in the ArcInTexETN project, in which you can take part of their works in progress.

ArcInTexETN is an EU-funded training network of early stage researchers exploring new expressions of living through textile thinking. They collaborate in three scales – building, interior, and body – looking into methods for turning current scientific knowledge into the design of new forms of living.

### Speculate

In three video projections, the students present different takes on the subject. There is “Ahti,” a speculative short film about the first human being born in space; the story is set in the future.

### Collaborate

In another video projection, with the hybrid animal Wolpertinger as an analogue, a collection of videos expose the working process of collaborative design when architects, and fashion and textile designers work together.

### Define

In the third film – What is interior? – the PhD students explore the term “interior” in their search for a definition for the term.

In addition, you will see individual research work.

Oh, and bring your nose and your curiosity! This is not only an audio-visual exhibition.

## OPENING

**23 March** at 16:00 at the Textile Museum in Borås, Sweden.  
Admission is free! No registration is needed.
