

ArcInTex network

The Arcintex Network meeting will be hosted by the Swedish School of Textiles, University of Borås. The meeting will be organized in digital format and will take place between the 11-12th of June.

The emergence of sustainable design thinking challenges textile research today. Subsequently, the first effect remarked in the field of smart textiles is the shift in materiality from digital to organic matter. In this context, the purpose of the next Arcintex meeting is to bring together exemplary research in the field of smart textiles, to share experiences and further reflections by analyzing this paradigm shift.
